Personal Profile

I am a self-taught Junior Developer known for my fast-learning ability and positive mindset. I have a strong interest in learning new technologies and solving complex problems. I recently completed a rigorous twelve-week Software Development Skills Bootcamp with Just IT, specialising in the fundamentals of both Web and Software development.

Education and IT Training

04/2024 - Present	Just IT Training Ltd, London Digital Skills Bootcamp: Software Development 12-week intensive bootcamp focused on Web and Software Development
10/2012 - 07/2015	Bialystok University of Technology, Bialystok, Poland BA in Tourism and Travel Management, Grade 2:1
09/2009 - 06/2012	Zespół Szkół nr 3, Bielsk Podlaski, Białystok 6 GCSE equivalents including English (94%) and Maths (56%)

IT Skills

Software Development Skills: Agile principles, OOP, Git + GitHub, React.js, MongoDB, Node.js, MySQL

Web Technology/ Framework: HTML, CSS, Bootstrap

Core Programming Languages: Python, SQL, JavaScript

API: REST, Flask

Projects: 1. Rock, Paper, Scissors game – A fun game built in JavaScript. You can select your choice by clicking a button and the computer's choice is randomly generated. The game uses event listeners for button clicks, updates scores and displays the results in the HTML using DOM methods.

2. To-Do List app - A to-do list app where users can add tasks by clicking a button or pressing the Enter key and remove them by clicking delete button. The app utilises event listeners, DOM manipulation and basic input validation.

3. Weather app – Built in JavaScript, the app that retrieves and displays the current weather information for a specified city using the OpenWeatherMap API. The app features an asynchronous function to fetch weather data, and dynamically updates the UI.

4. Film Flix app – FilmFlix is a project structured around the MVC design pattern. For the model, I used Python classes and methods to interact with an SQL database, handling data requests and responses. Using Flask, I built a RESTful API that facilitates CRUD operations on the database through HTTP requests. The retrieved data is rendered using HTML templates, which I styled with CSS for a user-friendly and interactive interface.

Experience

12/2023 - Present

Just IT Training Ltd, London

Trainee, Software Development Skills Bootcamp

- Proactively pursued self- learning opportunities in front and back-end technologies and completed a government- funded Bootcamp training course in Software Development, gaining expertise in Python, JavaScript, Node.js, Semantic HTML, CSS and more.
- I created 4 projects using JavaScript, Python, HTML, CSS and SQL.
- Actively participated in peer code reviews and consistently demonstrated a passion for software development.

05/2022 - 11/2023

Travis Perkins/ Benchmarx, Farnborough, Hampshire

Assistant Branch Manager

- I successfully grew our customer base by providing excellent customer service. This involved ensuring their satisfaction with CAD designs.
- Effective communication was key in my role, whether I was explaining complex CAD designs to customers or processing customer loans.
- Handling the P&L required quick thinking and problem-solving.

03/2019 - 05/2022

Wolseley, London

Showroom Manager

- Managing showroom marketing and delivering targets required efficient time management and organisational skills to balance multiple tasks and ensure efficiency.
- As a main hub for Landlords National Purchasing Group (LNPG) customers in the South, I adapted quickly to new ways of working.

05/2017 - 02/2019

B&Q plc., Guildford & London

Showroom Advisor/ Designer

- Collaborating with my team to meet sales targets.
- I resolved stock management issues and customer design concerns by quickly identifying problems and implementing effective solutions.

09/2015 - 04/2017

Gourmet Burger Kitchen, Guildford & Southampton

Supervisor

- Interviewing, hiring, training, scheduling and managing employees, as well as overseeing inventory including food and beverages, supplies and other restaurant equipment.

Interests and Achievements

Computing: I enjoy exploring the world of computing and love experimenting with new programming languages to create fun and interactive projects.

Hobbies:

- Hiking: I love hiking because it allows me to connect with nature and relax.
- Golf: (beginner) I like the mix of strategy and skill and of course beautiful golf courses.
- Artificial Intelligence: I have been exploring AI for a few months and enjoy how it boosts my creativity and personal development.
- Puzzle: I love solving puzzles because it sharpens my problem-solving skills.

Languages:

English - Fluent (preparing for IELTS)
German – Basic understanding
Polish - Native
